Dr. Shubhra Goel

DO, DNB, FMRF (Oculoplasty)

Ophthalmic Plasty & Facial Aesthetics

She is an Ophthalmologist with over seven years expertise in Plastic, Reconstructive and Aesthetic procedures and surgery around the eyes. Dr Goel had training in eye plasty at Sankara Nethralaya, Chennai and cosmetic facial surgery at University of Wisconsin, USA. She is amongst selected few in India who is formally trained in one of the

most advanced and niche specialities of Ophthalmology.

Her training allows her to offer an integrated approach that combines the microsurgical precision of Ophthalmology with the concepts of Aesthetic Facial Surgery. Dr Goel approaches all the surgeries with an aesthetic sense rendering natural looks with minimal risks. She has been faculty and preceptor for fellowship training program at Sankara Nethralaya and an honorary co-faculty for residents teaching program at the University of Wisconsin, USA.

She offers a wide array of surgical and non-surgical cosmetic and reconstructive procedures for enhancing the natural beauty of eyes and around. These include cosmetic eyelid, facial and forehead surgery, cosmetic Botox and soft tissue filler injections, facial fat transfer and treatment for dark circles. She also specializes in conditions like surgical repair of droopy eyelids, congenital eyelid abnormalities, tear duct and socket abnormalities, eyelid cancers and eyelid reconstructions, Orbit and facial fractures and tumors and Thyroid eye disease.

Look Good - Feel Good

Department of Ophthalmology

Ophthalmic Plastic & Facial Cosmetic Surgery

Ophthalmic Plastic and Facial Cosmetic Surgery is a very specialized area of ophthalmology that deals with the management of deformities and abnormalities of the eyelids, lacrimal (tear) system, orbit (eye socket), and the adjacent face. An ophthalmic plastic and reconstructive surgeon is an ophthalmologist (medical doctor and eye surgeon) who has completed additional training in plastic surgery as it relates to the eyes and their surrounding structures.

The word “plastic” is derived from a Greek word that means “to mold” or “to give form.” Plastic surgery is surgery that molds or reconstructs parts of the human body. Ophthalmic plastic surgery is plastic surgery that is limited to the structures surrounding the eye. Since this delicate surgery can affect one’s ability to see, ophthalmic plastic surgeons are best qualified to perform it and also to provide any care that the eye itself may need.

The Department of Ophthalmology at Apollo Hospitals, Jubilee Hills, Hyderabad provides a comprehensive range of Ophthalmic Plastic and Facial Cosmetic surgical services for both children and adults.
